

MUHAMAD PARISZ HIDAYAT

Frontend & Mobile Developer | Software Engineering Student

Bogor Regency, West Java, Indonesia • +62 822-4990-0957 • muhamadparisz08@gmail.com • parisz.my.id • github.com/Parisz08

SUMMARY

Frontend and mobile developer with hands-on experience building web and mobile applications using Laravel, Flutter, and JavaScript. Skilled at translating requirements into clean, interactive UI/UX and experienced in teaching programming fundamentals to over 100 students across multiple training programs. Adaptable and fast learner, comfortable working with modern frameworks (Next.js, Tailwind CSS) and collaborating on real-world development projects. Seeking an internship or entry-level role to further develop as a software engineer.

EXPERIENCE

Ujikom Project | *IDN Boarding School*

Jan 2026 – Apr 2026

- Co-developed a cross-platform attendance management app for JNE Martapura using Flutter and Firebase, implementing real-time check-in/out and automated reporting as part of a final vocational competency project (Ujikom).
- Collaborated within a team following a structured, project-based development workflow.

IT Trainer | *SMAN 17 Jakarta • SMAN 8 Kota Serang • SMKN 10 Jakarta*

2025

- Delivered hands-on web development training (HTML, CSS, JavaScript) to high school students across 3 schools through project-based learning programs.
- Designed lesson plans ranging from 1-day introductory sessions to multi-day hands-on workshops tailored to each school's needs.

PROJECTS

JNE MTP Attendance App | *Mobile App*

Tech Stack: Flutter, Firebase

- Developed a mobile attendance management app for JNE Martapura, featuring real-time check-in/out and automated attendance reporting; built as part of the Ujikom final project.

News App | *Mobile App*

Tech Stack: Flutter, News API

- Built a mobile news reader app that fetches and displays articles from a news API, with category browsing and a clean reading experience.

Payroll App | *Web App*

Tech Stack: Laravel

- Developed a web-based payroll management system in Laravel for calculating employee salaries, maintaining records, and generating reports.
